

# bet 3 6 5

There are two distinct types of bet you can make when playing online roulette

inside bets:

and outside bets.

What is an inside bet?

In roulette, an inside bet is where you put

your chips on individual numbers inside the roulette grid.

Because you're focusing on

individual numbers, rather than any red number for example, the roulette

odds are

significantly reduced. However, with the higher risk comes

a greater reward, so your

payout would be more generous.

Putting your chips on a single number is called a

straight-up bet, and this is the most common type of inside bet, paying

out at 35:1 in

European and American Roulette.

What is an outside bet?

Outside bets are made by

placing your bet on options outside of the numbered roulette

grid. These bets increase

your chances of winning on each spin, but pay out less than an

inside bet would.

You

can choose to bet on a grouping of numbers, such as the first 12, second

12, or third

12, or alternatively pick between 1-18 or 19-36. You can also choose to

bet on all

black or all red numbers, or decide between all odd and all

even numbers.

Experiment

with different combinations to suit your preference, and remember

you're playing free

online roulette, so it's all for fun!
