The Chrome Web Inspector and Debugger are conveniently built-in with Chrome. You can access them by hitting F12 while in your browser. By right clicking on the web page and selecting the Inspect menu item, this below shows a few different reviews that you'll find from the CHROME DevTools. How to use Chrome Inspector and Debugger. <https://www.washingtonpost.com/bsi/154-do-resources/assets/inspector-debugging...> In the hand corner of the browser window, click More tools where you'll find Developer. In a drop-down list: One more option is to use Chrome's
