One unique feature of Aviator is the fact that it allows you to make two bets at once. This gives you an interesting way to try and balance out these contrasting bet types. For example, you could keep things safe by betting on a multiplier of 1.50, and then add an element of risk by betting on a multiplier of 5.00. As the aircraft soars upward, the plane goes down, press the cash out button. Depending on where you stopped, the plane's coefficient will multiply your win. Your bet is lost if the Plane disappears or crashes before you cash in.
