

# sport bet bet

A +1.5 spread is commonly seen in baseball betting, the standard runline for MLB. This split means the underdog must win outright or lose by exactly one run to push the bet to a push. A -1.5 spread means that an favorite must win by at least two runs. Many baseball games have decided on fewer (than two runs).

What is Over/Under?

In Sports Betting, "Over" and "Under" refer to the total runs scored in a game. For example, if the over/under is 3.5, you would bet over if you think more than 3.5 runs will be scored, and under if you think fewer than 3.5 runs will be scored. The importance of bankroll management in sports betting is crucial. How to manage your bankroll is a common question for many bettors.
