The NFL is the most popular league in sports betting, with millions of Americans wagering at the top USA sportsbooks throughout the season. From football futures odds to NFL same-game parlays and NFL props, sports betting sites have something for every bettor. The Super Bowl has more wagering options than any sporting event of the year, giving fans something to look forward to with their sports betting bankroll.

NFL odds are constantly moving due to betting action, injuries and other factors, but monitoring the NFL odds board is one way to make the best NFL bets possible. Football odds are also a useful way to gain an edge in NFL survivor pools and NFL office pools. Here are several football sports betting terms to know:

Alternate lines: Every NFL game has alternate lines, as sportsbooks post different spreads and totals with adjusted odds. For example, if a team is favored by one touchdown, many sportsbooks will offer odds on the team to win by at least 10 points instead.

American odds: American odds are the most common odds used in the NFL, with the moneyline indicating the amount of money needed to win \$100 (favorite) or the amount that a \$100 wager would pay (underdog). This is one of the three main types of betting odds.

Closing Line: The final odds posted when the game begins is the closing line. The live odds will then start to shift after the game begins and will generally continue until the game is over.

Consensus: The consensus line is a combination of odds from the top sportsbooks. If a team is a 7-point consensus favorite, it means that most oddsmakers have the team favored by seven points.

Decimal odds: Decimal odds, also called European odds, are one of the other formats used to present betting odds. They represent the amount of money someone would win for every \$1 wagered.
